CORE BATTLE REFERENCE

Use with the starter battle packet and its fixed crews. This is a quick reference, not the full rules or a new scenario.

> ORDINARY / HIT

d20 + Stat + modifiers - Stress >= 13
Natural 1 fails; natural 20 succeeds.

> INJURY

d20 + DMG - Armour >= 13
One die per hit; ignore Stress. Each success removes 1 Wound. Each hit adds 1 Stress before Injury; Injury adds none.

> MELEE

Both roll eligible weapon ATK. STR, or AGI for Agile. Cancel normal successes with normal successes, critical 20s only with critical 20s. Only attacker surplus causes hits. Defence surplus causes no hits or Stress.

> COVER / CONDITIONS

Light -2; Heavy -4. Pinned/Down in cover: another -2 once. Hidden legal shot: -4 plus cover. No target without LOS. Pinned melee target: attacker +2.

> PINNED / DOWN / REVIVE

Recover spends Move to stand. At zero Wounds become Down; two rounds later at End Phase become Unconscious. Core + medkit in contact revives a Down friendly automatically: 1 Wound, Pinned, 2 Stress; once per patient per battle.

> ROUND LOOP

Clear Activated/Reacted, keep unspent ALERT; roll initiative. Alternate one whole-unit activation each. Each has Move + Core in either order. End Phase: effects, Down timers, Break/Rally, score and expire effects, restore actions, check end.

> ALERT / ORDERS

Core or Order grants ALERT. Spend it for one eligible reaction; normally once per round. Must see trigger in forward LOS, meet action range, be conscious, unengaged, unpinned and morale-free. Lose ALERT on a regular action/move, a hit, incapacitation or morale. Orders are single-use per battle.

> REACTIONS

Normally at start/end of visible enemy activation. Not mid-move. Return Fire declared before dice: independent normal shots, both finish before results apply. Dive: AGI, move up to 3 on success; Pinned either way. No reaction chains here.

> BREAK / RALLY

d20 + NRV - Stress >= 13
At End Phase, 2+ Stress without morale: Break. Success clears Stress. Failure at 2 = Broken/Pinned; 3-4 = Bolting; 5 = Bugging Out. Existing morale instead Rallies: success clears it/Stress, leaving Pinned.

> SCORING

Hold the Block: 1 VP per uncontested objective each End Phase; conscious, not Captured and morale-free. Pinned can count. Most VP after round 6 wins. Use packet p1 for all scenario end conditions.

WEAPON, EQUIPMENT & SKILL PROFILES

> WEAPONS

Weapon	ATK	DMG	Range	Hands / slots	Keyword rules
Unarmed	1	0	Melee	1 / 0	No keywords.
Carbine	1	2	24"	2 / 2	**Accurate:** Reroll one missed Attack Die.
Assault rifle	2	2	24"	2 / 2	**Automatic:** An automatic firearm rolls its printed ATK for one Ranged Attack action. This keyword adds no dice.
Sword / machete	2	1	Melee	1 / 1	**Agile:** Use AGI instead of STR for melee hit totals. Damage is unchanged. **Parry 1:** Add 1 die when defending in melee, not attacking.
Club / hammer	1	1	Melee	1 / 1	**Bash:** Reduce the target's Armour by 4 when resolving Injury rolls, to a minimum of 0.

ATK = number of d20s; DMG = Injury bonus. Two-handed firearms occupy both hands/weapon slots; Unarmed takes no weapon slot. Each fighter has one armour slot and two equipment slots.

> EQUIPMENT

Item / slots	Rules
Medkit 1 slot	Spend Core in contact with a Down teammate to revive it automatically under the Revival rules. Single-use; each patient can be revived once per battle.
Protective shield 1 slot	Occupies one hand and one equipment slot. Add 2 dice when defending in melee.
Frag grenade 1 slot / pair	Spend Core to throw up to 8 inches using the thrown-area procedure. Damage 1; 3-inch-diameter Blast. A miss Scatters. Single-use.
Smoke grenade 1 slot / pair	Spend Core to throw up to 8 inches using the thrown-area procedure. Place a 5-inch-diameter smoke screen; a miss Scatters. It clears at this round's End Phase. Single-use.

Each throw consumes one grenade; the remaining one still occupies its slot. Mark uses on the crew sheet. Placement, Scatter and smoke: p3.

> ARMOUR

Item / slots	Rules
Light armour 1 armour slot	Armour 2. Subtract from Injury rolls. No MOVE penalty.
Standard armour 1 armour slot	Armour 4. Subtract from Injury rolls. No MOVE penalty.

> SKILLS ON THESE CREWS

Skill / use	Rules
Tough Passive	Gain +1 Wound, up to your Wound limit: 3, or 4 for a crew leader.
Mark Target Core	Spend Core and test DEX against a visible enemy within 24 inches. Mark it until the start of your next activation: friendly shooting gains +2, and it loses Hidden and cannot Hide. Your crew may have one Marked enemy; a new mark replaces the old one.
Commanding Presence Passive	Once per round, a friendly within 8 inches and line of sight may use your NRV for a Break test.
Quick Passive	Gain +2 MOVE.
Sneak Passive	Sneak at full MOVE instead of half MOVE.

> STATS & LIMITS

Stats run from 0 to +6. Starting allocation depends on rank: Recruit 2 points, Fighter 3, Specialist 5, Veteran 7. This packet has one Veteran, one Specialist and four Fighters per crew.

Each complete 2 points in a Stat unlocks one associated skill for an eligible rank. Recruits/Fighters start without skills. The Leader has three; the Vanguard two. Skill effects are already included in MOVE/Wounds on their cards.

The Leader starts with 2 Wounds because of Tough. Everyone else has 1. The general limit is 3 Wounds, or 4 for a crew leader; it is not a starting allowance.

Worked pools: Vanguard: defence 5 dice + AGI 4; Charge 3 dice, DMG 1. Bruiser: defence 3 dice + STR 2; Charge 2 dice, DMG 1 with Bash.

PAGE REFERENCES ON THIS PROFILE SHEET REFER TO THE STARTER BATTLE PACKET.

CONDITION & ACTION TOKENS

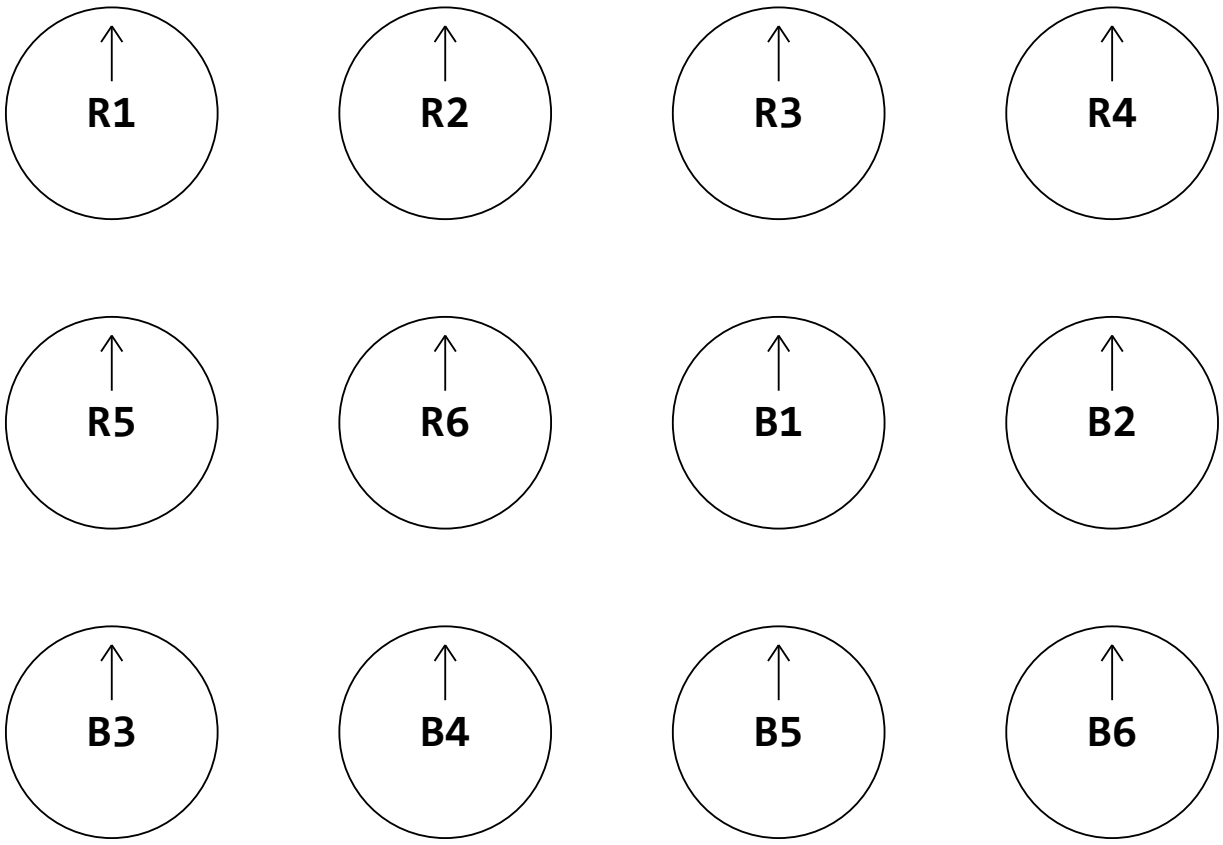

Cut on outlines. Use unit IDs and labels; no coloured ink is required. Track current states with tokens, spent items/Orders on the crew sheet.

1 inch / 25.4 mm calibration

PAPER UNIT MARKERS / 28 MM

Use as proxies by agreement. A flat counter still represents the normal standing body volume (about 2 inches tall) for LOS. The arrow marks its front. These are not extra units.

Optional objective-control markers (not fighters):

RED CONTROL	**BLUE** CONTROL	**RED** CONTROL	**BLUE** CONTROL	**RED** CONTROL	**BLUE** CONTROL

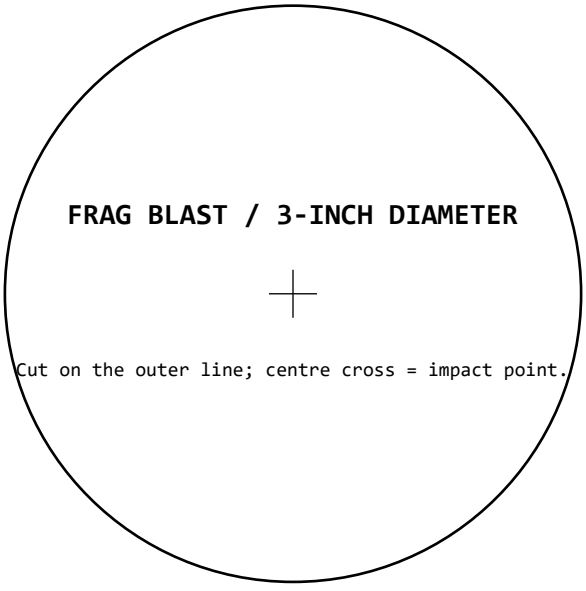

Use matching crew sheets R1-R6 and B1-B6. Cut circles precisely if measuring from these bases. Check the calibration before use.

1 inch / 25.4 mm

TEMPLATES / PRINT AT 100%

Print using **Actual Size / 100%**. Check the 1-inch calibration line before cutting. Place the centre cross at the impact point. These circles show diameters, not radii.

This line must measure 1 inch / 25.4 mm.

OBJECTIVE AREA / 6-INCH DIAMETER

Hold the Block uses three ground-level areas, each 6 inches across. Print three copies, or use the centre marker and measure a 3-inch radius. This area is not an obstacle.

Print at Actual Size / 100%, not Fit to Page. Score using the complete eligibility/contesting rules in the starter scenario.

1 inch / 25.4 mm
