HOST BRIEF & PREFLIGHT

Session ID: _____ Date: _____ Module: _____

Primary question (one):

Secondary question, optional:

Expected behaviour / what evidence could challenge it:

Rules version: _____ Packet version/hash: _____
Board/scenario: _____ Red/Blue roster IDs: _____
Players/group/pair IDs: _____
Mode: guided / focused / integration / unguided / regression
Platform: physical / virtual: _____ Observer: _____

> BEFORE PLAYERS ARRIVE

- ☐ Version, profiles, scoring and required rules checked.
- ☐ Board dimensions, deployment, cover/LOS/heights and routes agreed.
- ☐ Templates printed at 100%; 1-inch calibration line checked.
- ☐ One crew sheet per player; tokens and measuring tools ready.
- ☐ Logging tier and stop time chosen; hypotheses kept off player sheet.
- ☐ Recording, if any, agreed separately; no unnecessary identity data.

Timebox: _____ minutes. Player feedback is worksheet 5 only.
This is a test plan, not an observed result or an approved rule change.

ROUND & SCORE LOG

Session ID: _____ Date: _____ Module: _____

First player: Red / Blue Assistance: none / teach / rule rescue
Enter VP **earned that round**, not cumulative. Blank = unrecorded.

Round	Minutes	Red VP	Blue VP	Red conscious	Blue conscious	Break failures R/B
1						
2						
3						
4						
5						
6						

Final VP: Red ____ Blue ____ Outcome: Red / Blue / draw / incomplete
Rounds resolved: ____ First Down round: ____
Setup: ____ min Teach: ____ min Play: ____ min Feedback: ____ min

Major pause / lost useful activation / changed ruling (round and actor):

A stopped game has no invented winner. Track repeat groups and swapped pairs by ID. No recorded Break failures is different from no observed opportunities.

INCIDENT / RULES OBSERVATION

Session ID: _____ Date: _____ Module: _____

Observation ID: _____ Round: ____ Actor: ____ Rule owner ID: ____

Position / action / relevant state and resources:

What the player expected:

What actually happened (separate from your interpretation):

Effect on choices, progress, time or enjoyment:

Intervention or temporary ruling; evidence/photo link if permitted:

Issue candidate: contradiction / unclear text / power / pacing / board / tool / preference
Severity: critical / major / moderate / minor Confidence: _____
Link duplicate reports to one issue; preserve conflicting evidence.

FOCUSED MECHANIC TALLY

Session ID: _____ Date: _____ Module: _____

Measured block / fixture and which opportunities count:

Rule / ability	Eligible opportunities	Uses	Successes	Actions spent

Opportunity = legally available and relevant. Count successful uses once per use, not individual hits. Uses cannot exceed opportunities; successes cannot exceed uses. Keep fixed teaching dice out of random outcome rates.

What benefit occurred? What did it cost or prevent?

If unused: not noticed, unclear, irrelevant, risky, weak, other? Ask neutrally.

PLAYER EXIT SHEET

Session ID: _____ Date: _____ Module: _____

Player ID (not name): _____ Prior Settlements games: ____
Skirmish experience: new / occasional / regular
Please answer individually before the group discussion.

1. Best moment: what happened, and why did it work for you?

2. Most frustrating moment: what did you expect instead?

3. Which rule or reference caused the most uncertainty?

4. Did you have useful choices? Give one example of a good or forced choice.

5. Would you play again? Yes / No / Unsure. Why?

UNGUIDED PACKET CHECK

Session ID: _____ Date: _____ Module: _____

Observer sheet. Do not show the answers/checklist to learners first.
Mark I = independent, L = lookup solved, H = help, X = blocked, N/A.

Task	I / L / H / X / N/A	Page / time / observation
Find components, board size, deployment and objective placement.		
Identify each model, Stats, weapon rules and consumable quantities.		
Start a round, choose initiative and alternate full activations.		
Select a legal Move/Core action and resolve range/facing/cover.		
Resolve shooting, Injury, Stress and a melee cancellation example.		
Find ALERT/Order eligibility, Return Fire and token-loss timing.		
Resolve Down/revival, Break/Rally and objective eligibility.		
Score a round, identify the battle end and determine the result.		

Where was rescue necessary, and what did the learner expect to find?

Fresh group? Yes / No Packet-only learning? Yes / No
If rescued, continue if useful but label subsequent play assisted.
No rescue in a few groups is a checkpoint, not proof of release readiness.
